

**Lyon 3 University Jean Moulin**  
**France**

Study programme: Business Management Year: 2021 Master degree

**Winter** semester (semestr zimowy/ letni) academic year (rok akademicki) 2021-2022

City of the exchange: Lyon, France

Host University

- State University, 26.000 students, 240

Courses

- The first semester I took all the business courses, such as Product Distribution, Marketing, Management.
- The application procedure takes place long before the classes start and it is all online and the website of host university, you need to create an account and follow the instructions.
- The website is only in French so it creates some difficulties when dealing with the documents etc.
- Form of evaluation is in points where 20 points are max. Also, for many courses we were evaluated by final presentations in groups but for some we had exams.

Accommodation

- Host university provides some help with finding an accommodation in student residences, the application procedures also starts long before the academic year.

Communication with the host University

- emails

Cost of living

- 300 euros per month

Students' life

General opinion:

- France is one of the most complicated countries when filling documents and papers, it takes a while when you need the host university's response on any issue.
- Also it might be difficult to solve problems by yourself if you have some with the residences.
