

Course syllabus						
Course name:		Management Control				
Areas, Disciplines	:	Business Administration				
Study programme	e group:	Cycle of studies:		Study type:		
		I (Bachelor)		Full time		
Study programme	name:	BA in Management and	d Finance			
Speciality:						
Electivity:		Elective				
Course coordinate	or:	Robert Rieg				
Course code:		Year of studies:	Semeste	or.	Language of instruction:	
		III	6 (Sumn	ner)	English	
ECTS credits:		3				
Exam / assessmer	nt form:	Written exam				
	Class type	Total contact hours				
	lecture		30			
	A. Short	ened (general) subject d	lescriptio	n		
- Management control is a process by which managers influence other members of an organization to implement an organization's strategy (Anthony/Govindarajan (2007: 6). It is an important management concept which includes topics like planning and budgeting, coordination of activities in an organization, communicating targets and evaluating and incentivising goal achievement as well as identifying variances and deciding about corrective actions.						
	B. Prereqisities					
- Cost and financial accounting, capital budgeting and corporate finance						
C. Effects of Teaching						
Knowlege						
Code PEU					Study programme-	

- Understanding key concepts in management control: planning & budgeting cycle, performance measurement Discuss relevance of trends in management control: Skills				related learning			
Planning & budgeting cycle, performance measurement Discuss relevance of trends in management control Skills				outcome code			
Discuss relevance of trends in management control							
Code PEU - Being able to derive performance metrics from financial data, especially financial and value-based metrics; preparing budgets and operational plans - Social competence Code PEU - Team work: working on exercises an cases in teams - Team work: working on exercises an cases in teams - D. Course Content - Total contact hours - D. Sum - Sum - E. Methods and Criteria of Assessment Final grade FINAL GRADE FOR THE SUBJECT is determined according to the algorithm: Grade for "Workshop" grade * 100.00 % Additional requirements to pass the subject: None Partial grade for the form: Workshop The form evaluation is determined based on the results of the following components: Assessment component Weight in final Verification	-			-
